here.

Thank you to our CNAs!

You are indispensable members of the nursing team! Your attention, care, patience, quick thinking, determination, and kindness keep our entire community grounded. We would be nowhere without you here to bring stability to every shift.

You save lives every week by catching worrying signs and bringing them to light. And you save your colleagues every day by being another set of ears and eyes, catching lapses, revising the pressure on nurses, and helping us handle and move past some of the hardest moments in our jobs.

From nurses to patients, our whole community has you to thank for helping us feel more safe, comfortable, and relaxed. None of us would get far without you on the team.

Sincerely,
